Coolant Specification Change – Coolant D542 (Yellow)

MODEL 1997 MY-ON
XK8 Range

VIN
010343-ON

Issue:

A revised coolant, Jaguar D542, which is yellow, has entered XK8 production from VIN 010343.

Action:

Use only yellow Jaguar D542 coolant when topping up the coolant level on any XK8 from VIN 010343-on, as well as on any vehicle that has been converted to D542. Dilute the new coolant with an equal volume of clean water.

XK8 vehicles in the VIN range 001001-010342 were originally filled in production with Jaguar coolant D985 which is blue-green in color. Vehicles in VIN range 001036-010342 are covered by Service Action S813 which requires flushing out the earlier coolant and replacing it with D542. Vehicles which have been converted can be recognized by the yellow coolant color and a label (part no. MNA 7698AA) on the coolant reservoir.

Vehicles factory-filled with D542 (from VIN 010343-on) do not have the coolant reservoir sticker.

Parts Information:

DESCRIPTION
D542 coolant (yellow)

PART NUMBER
JLM 20404/3

CONTAINER SIZE
5 liter
