

Lower Wishbone – Fulcrum Bolt –
Revised Torque Specification

MODEL 1995-96 MY
Sedan Range
VIN 720001-ON

ISSUE:

The torque specification of the lower wishbone fulcrum nut & bolt of the front suspension has been revised in production from VIN 774401.

The revised torque specification is 100 Nm (previously 55 Nm).

ACTION:

Use the revised torque specification of 100 Nm (74 lb. ft.) on **all** Sedan Range vehicles from VIN 720001 on, when performing service operations on the front suspension that require loosening or removing the lower wishbone fulcrum nut and/or bolt (Illustration 1).

There is **NO** need to apply the increased torque specification to existing vehicles in the VIN Range 720001-774400 unless the lower wishbone fulcrum nut and/or bolt are loosened.
